CUSTOMER CARE

For service at any time, go to www.workoutwarehouse.com.

Or call 1-877-776-4777
Mon.–Fri. 6 a.m.–6 p.m. MT
Sat. 8 a.m.–12 p.m. MT

Please do not contact the store.

CAUTION

Read all precautions and instructions in this manual before using this equipment. Save this manual for future reference.
WARNING DECAL PLACEMENT

This drawing shows the locations of the warning decals. If a decal is missing or illegible, call the telephone number on the front cover of this manual and request a free replacement decal. Apply the decal in the location shown. Note: The decals may not be shown at actual size.

CAUTION
KEEP HANDS AND FEET AWAY FROM THIS AREA WHILE THE TREADMILL IS IN OPERATION.

PRECAUCIÓN
Mantenga sus manos y pies alejados de esta área mientras la caminadora esté en operación.

GOLD'S GYM is a registered trademark of Gold's Gym International, Inc. This product is manufactured and distributed under license from Gold's Gym Merchandising, Inc.
1. It is the responsibility of the owner to ensure that all users of this treadmill are adequately informed of all warnings and precautions.

2. Before beginning any exercise program, consult your physician. This is especially important for persons over age 35 or persons with pre-existing health problems.

3. Use the treadmill only as described in this manual.

4. The treadmill is intended for home use only. Do not use the treadmill in any commercial, rental, or institutional setting.

5. Place the treadmill on a level surface, with at least 8 ft. (2.4 m) of clearance behind it and 2 ft. (0.6 m) on each side. Do not place the treadmill on any surface that blocks air openings. To protect the floor or carpet from damage, place a mat under the treadmill.

6. Do not operate the treadmill where aerosol products are used or where oxygen is being administered.

7. Keep the treadmill indoors, away from moisture and dust. Do not put the treadmill in a garage or covered patio, or near water.

8. Keep children under age 12 and pets away from the treadmill at all times.

9. The treadmill should be used only by persons weighing 300 lbs. (136 kg) or less.

10. Never allow more than one person on the treadmill at a time.

11. Wear appropriate exercise clothes while using the treadmill. Do not wear loose clothes that could become caught in the treadmill. Athletic support clothes are recommended for both men and women. Always wear athletic shoes. Never use the treadmill with bare feet, wearing only stockings, or in sandals.

12. Plug the power cord into a surge suppressor (not included), and plug the surge suppressor into an appropriate outlet (see page 16). To avoid overloading the circuit, do not plug other electrical devices, except for low-power devices such as cell phone chargers, into the surge suppressor or into an outlet on the same circuit.

13. Use only a surge suppressor that meets all of the specifications described on page 16. To purchase a surge suppressor, see your local GOLD’S GYM dealer, call the telephone number on the front cover of this manual, or see your local electronics store.

14. Failure to use a properly functioning surge suppressor could result in damage to the control system of the treadmill. If the control system is damaged, the walking belt may slow, accelerate, or stop unexpectedly, which may result in a fall and serious injury.

15. Keep the power cord and the surge suppressor away from heated surfaces.

16. Never move the walking belt while the power is turned off. Do not operate the treadmill if the power cord or plug is damaged, or if the treadmill is not working properly. (See TROUBLESHOOTING on page 23 if the treadmill is not working properly.)

17. Read, understand, and test the emergency stop procedure before using the treadmill (see HOW TO TURN ON THE POWER on page 18).

18. Never start the treadmill while you are standing on the walking belt. Always hold the handrails while using the treadmill.

19. The treadmill is capable of high speeds. Adjust the speed in small increments to avoid sudden jumps in speed.
20. The heart rate monitor is not a medical device. Various factors, including the user’s movement, may affect the accuracy of heart rate readings. The heart rate monitor is intended only as an exercise aid in determining heart rate trends in general.

21. Never leave the treadmill unattended while it is running. Always remove the key, press the power switch into the off position (see the drawing on page 6 for the location of the power switch), and unplug the power cord when the treadmill is not in use.

22. Do not attempt to move the treadmill until it is properly assembled. (See ASSEMBLY on page 8 and HOW TO FOLD AND MOVE THE TREADMILL on page 22.) You must be able to safely lift 45 lbs. (20 kg) to move the treadmill.

23. When folding or moving the treadmill, make sure that the storage latch is holding the frame securely in the storage position.

24. Do not change the incline of the treadmill by placing objects under the treadmill.

25. Never insert any object into any opening on the treadmill.

26. Inspect and properly tighten all parts of the treadmill regularly.

27. **DANGER:** Always unplug the power cord immediately after use, before cleaning the treadmill, and before performing the maintenance and adjustment procedures described in this manual. Never remove the motor hood unless instructed to do so by an authorized service representative. Servicing other than the procedures in this manual should be performed by an authorized service representative only.

28. Over exercising may result in serious injury or death. If you feel faint or if you experience pain while exercising, stop immediately and cool down.

SAVE THESE INSTRUCTIONS
Your new fitness equipment is not an ordinary purchase; it is an investment in your health and well-being for years to come.

As the leading provider of manufacturer’s extended service plans, ICON strives to protect your equipment and your future.

Please review the following service plans and find one that best fits your needs.

### PREVENTIVE MAINTENANCE SERVICE PLANS

To protect your fitness equipment today, please call Customer Care at 1-800-677-3838. Or, visit us online at www.utserv.com.
BEFORE YOU BEGIN

Thank you for selecting the new GOLD’S GYM® TRAINER 720 treadmill. The TRAINER 720 treadmill provides an impressive selection of features designed to make your workouts at home more effective and enjoyable.

For your benefit, read this manual carefully before you use the treadmill. If you have questions after reading this manual, please see the front cover of this manual. To help us assist you, note the product model number and serial number before contacting us. The model number and the location of the serial number decal are shown on the front cover of this manual.

Before reading further, please familiarize yourself with the parts that are labeled in the drawing below.

---

Length:  6 ft. 1 in. (185 cm)
Width:  3 ft. (91 cm)

---

Handrail
Storage Latch
Walking Belt
Foot Rail
Idler Roller
Adjustment Screws
Console
Heart Rate Monitor
Key/Clip
Motor Hood
Power Switch
Power Cord
Wheel
Platform Cushions
PART IDENTIFICATION CHART

Use the drawings below to identify small parts used for assembly. The number in parentheses below each drawing is the key number of the part, from the PART LIST near the end of this manual. The number following the key number is the quantity used for assembly. Note: If a part is not in the hardware kit, check to see whether it is preattached. Extra parts may be included.

1/4” Star Washer (26)–6
5/16” Star Washer (11)–8
3/8” Star Washer (13)–6

#8 x 1/2” Silver Screw (10)–1
#8 x 1/2” Screw (1)–8
#8 x 3/4” Screw (4)–8

5/16” x 1 1/4” Screw (5)–2
5/16” x 1 3/4” Screw (9)–2
5/16” x 2 1/4” Screw (28)–4
3/8” x 4” Screw (7)–6
1/4” x 4 1/2” Screw (6)–2
ASSEMBLY

• To hire a service technician to assemble this product in your home, call 1-800-445-2480.

• Assembly requires two persons.

• Place all parts in a cleared area and remove the packing materials. Do not dispose of the packing materials until you finish all assembly steps.

• After shipping, there may be an oily substance on the exterior of the treadmill. This is normal. If there is an oily substance on the treadmill, wipe it off with a soft cloth and a mild, non-abrasive cleaner.

• Left parts are marked “L” or “Left” and right parts are marked “R” or “Right.”

• To identify small parts, see page 7.

• Assembly requires the following tools:
  the included hex keys
  one Phillips screwdriver

To avoid damaging parts, do not use power tools.

1. Go to www.workoutwarehouse.com/registration on your computer and register your product.

• activates your warranty

• saves you time if you ever need to contact Customer Care

• allows us to notify you of upgrades and offers

Note: If you do not have Internet access, call Customer Care (see the front cover of this manual) and register your product.
2. **Make sure that the power cord is unplugged.**

Press a Base Cap (74) into each side of the Base (94).

Identify the Right Upright (90). Have a second person hold the Right Upright near the Base (94).

**See the inset drawing.** Tie the wire tie in the Right Upright (90) securely around the end of the Upright Wire (81). Then, insert the Upright Wire into the lower end of the Right Upright as you pull the other end of the wire tie out of the Right Upright.

3. Lay the Right Upright (90) near the Base (94). Press the Grommet (77) into the square hole in the Right Upright. **Make sure not to pinch the ground wire.**

Then, attach the ground wire to the Right Upright (90) with a #8 x 1/2" Silver Screw (10).
4. Hold the Right Upright (90) against the Base (94). **Be careful not to pinch the wires.** Partially tighten three 3/8” x 4” Screws (7) with three 3/8” Star Washers (13) into the Right Upright and the Base; **do not fully tighten the Screws yet.**

**Attach the Left Upright (not shown) in the same way.** Note: There are no wires on the left side.

5. Identify the Left and Right Base Covers (82, 83). Slide the Left and Right Base Covers onto the Left and Right Uprights (89, 90) as shown.
6. Identify the Right Handrail (84).

   Attach the Right Handrail (84) to the Right Upright (90) with two 5/16” x 2 1/4” Screws (28) and two 5/16” Star Washers (11). **Make sure not to pinch the Upright Wire (81). Start both Screws, and then tighten them.**

   **Attach the Left Handrail (not shown) to the Left Upright (not shown) in the same way.**
   **Note:** There are no wires on the left side.

7. Set the Console Base (64) face down on a soft surface to avoid scratching the Console Base. **Do not lift the Console Base by the pulse grips.**

   Remove and save the four 1/4” x 1/2” Screws (2). The Screws will be used in a later step.

   Identify the Left Tray (36). Attach the Left Tray with four #8 x 1/2” Screws (1).

   **Attach the Right Tray (27) in the same way.**
8. With the help of a second person, hold the console assembly near the Right Handrail (84) and the Left Handrail (not shown).

See the inset drawing. Connect the Upright Wire (81) to the console wire. The connectors should slide together easily and snap into place. If they do not, turn one connector and try again. IF YOU DO NOT CONNECT THE CONNECTORS PROPERLY, THE CONSOLE MAY BECOME DAMAGED WHEN YOU TURN ON THE POWER. Then, remove the wire tie from the Upright Wire.

9. Set the console assembly on the Right and Left Handrails (84, 85). Make sure that no wires are pinched. Insert the excess Upright Wire (81) into the Right Upright (90).

Attach the console assembly to the brackets on the Handrails (84, 85) with the four 1/4" x 1/2" Screws (2) that you removed in step 7 and four 1/4" Star Washers (26). Do not tighten the Screws yet.
10. Attach the console assembly with two 5/16" x 1 1/4" Screws (5), two 5/16" x 1 3/4" Screws (9), and four 5/16" Washers (11). **Start all four Screws, and then tighten them.**

11. Attach the Right and Left Handrail Covers (31, 87) with six #8 x 3/4" Screws (4). **Be careful not to overtighten the Screws.**
12. Slide the Right and Left Handrail Grips (8, 79) onto the Right and Left Handrail Covers (not shown). Attach the Handrail Grips with two #8 x 3/4" Screws (4). Be careful not to overtighten the Screws.

13. Orient the Latch Housing (62) as shown. Attach the Latch Housing to the Left Upright (89) with two 1/4" x 4 1/2" Screws (6) and two 1/4" Star Washers (26). Start both Screws, and then tighten them.
14. Firmly tighten all six 3/8" x 4" Screws (7). Then, slide the Left and Right Base Covers (82, 83) downward.

15. Make sure that all parts are properly tightened before you use the treadmill. If there are sheets of plastic on the treadmill decals, remove the plastic. To protect the floor or carpet, place a mat under the treadmill. To avoid damage to the console, keep the treadmill out of direct sunlight. Keep the included hex key in a secure place; the hex key is used to adjust the walking belt (see page 24). Note: Extra hardware may be included.
OPERATION AND ADJUSTMENT

HOW TO CONNECT THE POWER CORD

Use a Surge Suppressor

Your treadmill, like other electronic equipment, can be damaged by sudden voltage changes in your home’s power. Voltage surges, spikes, and noise interference can result from weather conditions or from other appliances being turned on or off. To decrease the risk of damaging the treadmill, always use a surge suppressor with the treadmill. To purchase a surge suppressor, see precaution 13 on page 3.

Use only a surge suppressor that is UL 1449 listed as a transient voltage surge suppressor (TVSS). The surge suppressor must have a UL suppressed voltage rating of 400 volts or less and a minimum surge dissipation of 450 joules. The surge suppressor must also be electrically rated for 120 volts AC and 15 amps. There must be a monitoring light on the surge suppressor to indicate whether it is functioning properly. Failure to use a properly functioning surge suppressor could result in damage to the control system of the treadmill and serious injury to users.

Plug in the Power Cord

The treadmill must be grounded. If it should malfunction or break down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. The treadmill power cord has a plug with a grounding pin (see drawing 1 on this page).

⚠️ DANGER: Improper connection of the power cord increases the risk of electric shock. Do not modify the plug—if it will not fit an outlet, have a proper outlet installed by a qualified electrician. If you are unsure whether the treadmill is properly grounded, contact a qualified electrician.

Plug the power cord into a surge suppressor, and plug the surge suppressor into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. The outlet must be on a nominal 120-volt circuit capable of carrying 15 or more amps. To avoid overloading the circuit, do not plug other electrical devices, except for low-power devices such as cell phone chargers, into the surge suppressor or into an outlet on the same circuit. IMPORTANT: The treadmill is not compatible with GFCI-equipped outlets and may not be compatible with AFCI-equipped outlets.

A temporary adapter may be used to connect the surge suppressor to a 2-pole receptacle if a properly grounded outlet is not available.

The lug or wire extending from the adapter must be connected with a metal screw to a permanent ground such as a properly grounded outlet box cover. Some 2-pole receptacle outlet box covers are not grounded. Before using an adapter, contact a qualified electrician to determine whether the outlet box cover is grounded. The temporary adapter should be used only until a properly grounded outlet can be installed by a qualified electrician.
FEATURES OF THE CONSOLE

The treadmill console offers an impressive array of features designed to make your workouts more effective and enjoyable. When you use the manual mode, you can change the speed and incline of the treadmill with the touch of a button. As you exercise, the console will display instant exercise feedback. You can even measure your heart rate using the handgrip heart rate monitor.

In addition, the console features a selection of onboard workouts. Each workout automatically controls the speed and incline of the treadmill as it guides you through an effective exercise session.

You can even listen to your favorite workout music or audio books with the console’s sound system while you exercise.

To turn on the power, see page 18. To use the manual mode, see page 18. To use an onboard workout, see page 20. To use the information mode, see page 21. To use the sound system, see page 21.

Note: The console can display speed and distance in either miles or kilometers. To find which unit of measurement is selected, see THE INFORMATION MODE on page 21. For simplicity, all instructions in this manual refer to miles.

IMPORTANT: If there are sheets of plastic on the console, remove the plastic. To prevent damage to the walking platform, wear clean athletic shoes while using the treadmill. The first time you use the treadmill, observe the alignment of the walking belt, and center the walking belt if necessary (see page 24).
HOW TO TURN ON THE POWER

IMPORTANT: If the treadmill has been exposed to cold temperatures, allow it to warm to room temperature before you turn on the power. If you do not do this, you may damage the console displays or other electrical components.

Plug in the power cord (see page 16). Next, locate the power switch on the treadmill frame near the power cord. Press the power switch into the reset position.

IMPORTANT: The console features a display demo mode, designed to be used if the treadmill is displayed in a store. If the displays light as soon as you plug in the power cord and press the power switch into the reset position, the demo mode is turned on. To turn off the demo mode, hold down the Stop button for a few seconds. If the displays remain lit, see THE INFORMATION MODE on page 21 to turn off the demo mode.

Next, stand on the foot rails of the treadmill. Find the clip attached to the key, and slide the clip onto the waistband of your clothes. Then, insert the key into the console. After a moment, the displays will light. IMPORTANT: In an emergency, the key can be pulled from the console, causing the walking belt to slow to a stop. Test the clip by carefully taking a few steps backward; if the key is not pulled from the console, adjust the position of the clip.

HOW TO USE THE MANUAL MODE

1. Insert the key into the console.

   See HOW TO TURN ON THE POWER at the left.

2. Select the manual mode.

   When the key is inserted, the manual mode will be selected. If an onboard workout has been selected, press the Manual button on the console.

3. Start the walking belt.

   To start the walking belt, press the Start button, the Speed increase button, or one of the speed buttons numbered 1 through 10.

   If you press the Start button or the Speed increase button, the walking belt will begin to move at 1 mph. As you exercise, change the speed of the walking belt as desired by pressing the Speed increase and decrease buttons. Each time you press one of the buttons, the speed setting will change by 0.1 mph; if you hold down the button, the speed setting will change in increments of 0.5 mph. Note: After you press the button, it may take a moment for the walking belt to reach the selected speed setting.

   If you press one of the numbered speed buttons, the walking belt will gradually change speed until it reaches the selected speed setting.

   To stop the walking belt, press the Stop button. The time will begin to flash in the display. To restart the walking belt, press the Start button or the Speed increase button.

4. Change the incline of the treadmill as desired.

   To change the incline of the treadmill, press the Incline increase or decrease button or one of the incline buttons numbered 0 through 10. Each time you press one of the buttons, the treadmill will gradually adjust to the selected incline setting.
5. **Follow your progress with the displays.**

   **Time/Distance display**—When the manual mode is selected, this display will show the elapsed time. When a workout is selected, the display will show the time remaining in the workout rather than the elapsed time. This display will also show the distance that you have walked or run.

   **Incline/Calories display**—This display will show the incline setting for several seconds, each time the incline changes. This display will also show the approximate amount of calories you have burned.

   **Heart Rate/Speed display**—This display will show your heart rate when you use the handgrip heart rate monitor. This display will also show the speed of the walking belt.

   To reset the displays, press the Stop button, remove the key, and then reinsert the key.

6. **Measure your heart rate if desired.**

   Before using the handgrip heart rate monitor, remove the sheets of plastic from the metal contacts on the pulse bar. In addition, make sure that your hands are clean.

   To measure your heart rate, **stand on the foot rails** and hold the pulse bar with your palms on the contacts; **avoid moving your hands**. When your pulse is detected, several dashes will appear and then your heart rate will be shown. **For the most accurate heart rate reading, continue to hold the contacts for about 15 seconds.**

7. **Turn on the fan if desired.**

   The fan features multiple speed settings. Press the fan buttons repeatedly to select a fan speed or to turn off the fan.

8. **When you are finished exercising, remove the key from the console.**

   Step onto the foot rails, press the Stop button, and **adjust the incline of the treadmill to zero**. The incline must be at zero or you may damage the treadmill when you fold it to the storage position. Next, remove the key from the console and put it in a secure place.

   When you are finished using the treadmill, press the power switch into the off position and unplug the power cord. **IMPORTANT: If you do not do this, the treadmill’s electrical components may wear prematurely.**
HOW TO USE AN ONBOARD WORKOUT

1. **Insert the key into the console.**

   See HOW TO TURN ON THE POWER on page 18.

2. **Select an onboard workout.**

   To select an onboard workout, press the Calorie button, the Intensity button, the Speed button, or the Incline button repeatedly until the desired workout appears in the display.

   When you select an onboard workout, the displays will show the maximum incline, the maximum speed, and the duration of the workout.

3. **Start the workout.**

   Press the Start button or the Speed increase button to start the workout. A moment after you press the button, the treadmill will automatically adjust to the first speed and incline settings of the workout. Hold the handrails and begin walking.

   Each workout is divided into segments. One speed setting and one incline setting are programmed for each segment. Note: The same speed setting and/or incline setting may be programmed for consecutive segments.

If the speed or incline setting is too high or too low at any time during the workout, you can manually override the setting by pressing the Speed or Incline buttons; however, when the next segment of the workout begins, the treadmill will automatically adjust to the speed and incline settings for the next segment.

To stop the workout at any time, press the Stop button. The time will begin to flash in the display. To resume the workout, press the Start button or the Speed increase button. The walking belt will begin to move at 1 mph. When the next segment of the workout begins, the treadmill will automatically adjust to the speed and incline settings for the next segment.

4. **Follow your progress with the displays.**

   See step 5 on page 19.

5. **Measure your heart rate if desired.**

   See step 6 on page 19.

6. **Turn on the fan if desired.**

   See step 7 on page 19.

7. **When you are finished exercising, remove the key from the console.**

   See step 8 on page 19.
THE INFORMATION MODE

The console features an information mode that keeps track of the total number of hours that the treadmill has been used and the total distance that the walking belt has moved. The information mode also allows you to select miles or kilometers as the unit of measurement.

To select the information mode, hold down the Stop button while inserting the key into the console and then release the Stop button. When the information mode is selected, the following information will be shown:

The Incline/Calories display will show the total number of hours the treadmill has been used.

The Time/Distance display will show the total number of miles (or kilometers) that the walking belt has moved.

An “E” for English miles or an “M” for metric kilometers will appear in the Heart Rate/Speed display. Press the Speed increase button to change the unit of measurement if desired.

To exit the information mode, remove the key from the console.

HOW TO USE THE SOUND SYSTEM

To play music or audio books through the console sound system while you exercise, plug a 3.5 mm male to 3.5 mm male audio cable (not included) into the jack on the console and into a jack on your MP3 player, CD player, or other personal audio player; make sure that the audio cable is fully plugged in. Note: To purchase an audio cable, see your local electronics store.

Next, press the play button on your personal audio player. Adjust the volume level using the volume increase and decrease buttons on the console or the volume control on your personal audio player.

If you are using a personal CD player and the CD skips, set the CD player on the floor or another flat surface instead of on the console.
HOW TO FOLD AND MOVE THE TREADMILL

HOW TO FOLD THE TREADMILL

To avoid damaging the treadmill, adjust the incline to zero before you fold the treadmill. Then, remove the key and unplug the power cord. CAUTION: You must be able to safely lift 45 lbs. (20 kg) to raise, lower, or move the treadmill.

1. Hold the metal frame firmly in the location shown by the arrow below. CAUTION: Do not hold the frame by the plastic foot rails. Bend your legs and keep your back straight as you raise the frame about halfway to the vertical position.

2. Hold the frame firmly with your right hand. Pull the latch knob to the left and hold it. Raise the frame until the latch plate is aligned with the latch pin. Then, slowly release the latch knob; make sure that the latch pin is resting on the latch plate.

HOW TO MOVE THE TREADMILL

Before moving the treadmill, fold it as described at the left. CAUTION: Make sure that the latch knob is locked in the storage position. Moving the treadmill may require two people.

1. Hold the frame and one of the handrails, and place one foot against a wheel.

2. Pull back on the handrail until the treadmill will roll on the wheels, and carefully move it to the desired location. CAUTION: Do not move the treadmill without tipping it back, do not pull on the frame, and do not move the treadmill over an uneven surface.

3. Place one foot against a wheel, and carefully lower the treadmill.

HOW TO LOWER THE TREADMILL FOR USE

1. See drawing 2. Hold the upper end of the treadmill with your right hand. Pull the latch knob to the left and hold it. Next, lower the frame until it is past the latch pin. Make sure that the pin does not hit against the foot rail. Then, release the latch knob.

2. See drawing 1 at the left. Hold the metal frame firmly with both hands, and lower it to the floor. CAUTION: Do not hold the frame by the plastic foot rails, and do not drop the frame. Bend your legs and keep your back straight.

To protect the floor or carpet, place a mat under the treadmill. Keep the treadmill out of direct sunlight. Do not leave the treadmill in the storage position in temperatures above 85° F (30° C).
Most treadmill problems can be solved by following the simple steps below. Find the symptom that applies, and follow the steps listed. If further assistance is needed, see the front cover of this manual.

**SYMPTOM: The power does not turn on**

a. Make sure that the power cord is plugged into a surge suppressor and that the surge suppressor is plugged into a properly grounded outlet (see page 16). Use only a surge suppressor that meets all of the specifications described on page 16. **IMPORTANT:** The treadmill is not compatible with GFCI-equipped outlets and may not be compatible with AFCI-equipped outlets.

b. After the power cord has been plugged in, make sure that the key is inserted into the console.

c. Check the power switch located on the treadmill frame near the power cord. If the switch protrudes as shown, the switch has tripped. To reset the power switch, wait for five minutes and then press the switch back in.

**SYMPTOM: The power turns off during use**

a. Check the power switch (see the drawing above). If the switch has tripped, wait for five minutes and then press the switch back in.

b. Make sure that the power cord is plugged in. If the power cord is plugged in, unplug it, wait for five minutes, and then plug it back in.

c. Remove the key from the console, and then reinsert it.

d. If the treadmill still will not run, please see the front cover of this manual.

**SYMPTOM: The console displays remain lit when you remove the key from the console**

a. The console features a display demo mode, designed to be used if the treadmill is displayed in a store. If the displays remain lit when you remove the key, the demo mode is turned on. To turn off the demo mode, hold down the Stop button for a few seconds. If the displays are still lit, see THE INFORMATION MODE on page 21 to turn off the demo mode.

**SYMPTOM: The displays of the console do not function properly**

a. Remove the key from the console and **UNPLUG THE POWER CORD.** Next, remove the five #8 x 3/4" Screws (4), and carefully pivot off the Motor Hood (65). Next, locate the Reed Switch (52) and the Magnet (50) on the left side of the Pulley (49). Turn the Pulley until the Magnet is aligned with the Reed Switch. **Make sure that the gap between the Magnet and the Reed Switch is about 1/8 in. (3 mm).** If necessary, loosen the #8 x 3/4" Truss Head Screw (14), move the Reed Switch slightly, and then retighten the Screw. Reattach the Motor Hood (not shown), and run the treadmill for a few minutes to check for a correct speed reading.
SYMPTOM: The incline of the treadmill does not change correctly

a. Hold down the Stop button and the Speed increase button, insert the key into the console, and then release the Stop button and the Speed increase button. Next, press the Stop button and then press the Incline increase or decrease button. The treadmill will automatically rise to the maximum incline level and then return to the minimum level. This will recalibrate the incline system. If the incline system does not begin calibrating, press the Stop button again, and then press the Incline increase or decrease button again. When the incline system is calibrated, remove the key from the console.

SYMPTOM: The walking belt slows when walked on

a. Use only a surge suppressor that meets all of the specifications described on page 16.

b. If the walking belt is overtightened, treadmill performance may decrease and the walking belt may become damaged. Remove the key and UNPLUG THE POWER CORD. Using the hex key, turn both idler roller screws counterclockwise, 1/4 of a turn. When the walking belt is properly tightened, you should be able to lift each edge of the walking belt 2 to 3 in. (5 to 7 cm) off the walking platform. Be careful to keep the walking belt centered. Then, plug in the power cord, insert the key, and run the treadmill for a few minutes. Repeat until the walking belt is properly tightened.

c. Your treadmill features a walking belt coated with high-performance lubricant. IMPORTANT: Never apply silicone spray or other substances to the walking belt or the walking platform unless instructed to do so by an authorized service representative. Such substances may deteriorate the walking belt and cause excessive wear. If you suspect that the walking belt needs more lubricant, see the front cover of this manual.

d. If the walking belt still slows when walked on, see the front cover of this manual.

SYMPTOM: The walking belt is off-center or slips when walked on

a. If the walking belt is off-center, first remove the key and UNPLUG THE POWER CORD. If the walking belt has shifted to the left, use the hex key to turn the left idler roller screw clockwise 1/2 of a turn; if the walking belt has shifted to the right, turn the left idler roller screw counterclockwise 1/2 of a turn. Be careful not to overtighten the walking belt. Then, plug in the power cord, insert the key, and run the treadmill for a few minutes. Repeat until the walking belt is centered.

b. If the walking belt slips when walked on, first remove the key and UNPLUG THE POWER CORD. Using the hex key, turn both idler roller screws clockwise, 1/4 of a turn. When the walking belt is correctly tightened, you should be able to lift each edge of the walking belt 2 to 3 in. (5 to 7 cm) off the walking platform. Be careful to keep the walking belt centered. Then, plug in the power cord, insert the key, and carefully walk on the treadmill for a few minutes. Repeat until the walking belt is properly tightened.
EXERCISE GUIDELINES

WARNING: Before beginning this or any exercise program, consult your physician. This is especially important for persons over age 35 or persons with pre-existing health problems.

The heart rate monitor is not a medical device. Various factors may affect the accuracy of heart rate readings. The heart rate monitor is intended only as an exercise aid in determining heart rate trends in general.

These guidelines will help you to plan your exercise program. For detailed exercise information, obtain a reputable book or consult your physician. Remember, proper nutrition and adequate rest are essential for successful results.

EXERCISE INTENSITY

Whether your goal is to burn fat or to strengthen your cardiovascular system, exercising at the proper intensity is the key to achieving results. You can use your heart rate as a guide to find the proper intensity level. The chart below shows recommended heart rates for fat burning and aerobic exercise.

<table>
<thead>
<tr>
<th>165</th>
<th>155</th>
<th>145</th>
<th>140</th>
<th>130</th>
<th>125</th>
<th>115</th>
</tr>
</thead>
<tbody>
<tr>
<td>145</td>
<td>138</td>
<td>130</td>
<td>125</td>
<td>118</td>
<td>110</td>
<td>103</td>
</tr>
<tr>
<td>125</td>
<td>120</td>
<td>115</td>
<td>110</td>
<td>105</td>
<td>95</td>
<td>90</td>
</tr>
<tr>
<td>20</td>
<td>30</td>
<td>40</td>
<td>50</td>
<td>60</td>
<td>70</td>
<td>80</td>
</tr>
</tbody>
</table>

To find the proper intensity level, find your age at the bottom of the chart (ages are rounded off to the nearest ten years). The three numbers listed above your age define your “training zone.” The lowest number is the heart rate for fat burning, the middle number is the heart rate for maximum fat burning, and the highest number is the heart rate for aerobic exercise.

Burning Fat—To burn fat effectively, you must exercise at a low intensity level for a sustained period of time. During the first few minutes of exercise, your body uses carbohydrate calories for energy. Only after the first few minutes of exercise does your body begin to use stored fat calories for energy. If your goal is to burn fat, adjust the intensity of your exercise until your heart rate is near the lowest number in your training zone. For maximum fat burning, exercise with your heart rate near the middle number in your training zone.

Aerobic Exercise—If your goal is to strengthen your cardiovascular system, you must perform aerobic exercise, which is activity that requires large amounts of oxygen for prolonged periods of time. For aerobic exercise, adjust the intensity of your exercise until your heart rate is near the highest number in your training zone.

WORKOUT GUIDELINES

Warming Up—Start with 5 to 10 minutes of stretching and light exercise. A warm-up increases your body temperature, heart rate, and circulation in preparation for exercise.

Training Zone Exercise—Exercise for 20 to 30 minutes with your heart rate in your training zone. (During the first few weeks of your exercise program, do not keep your heart rate in your training zone for longer than 20 minutes.) Breathe regularly and deeply as you exercise; never hold your breath.

Cooling Down—Finish with 5 to 10 minutes of stretching. Stretching increases the flexibility of your muscles and helps to prevent post-exercise problems.

EXERCISE FREQUENCY

To maintain or improve your condition, complete three workouts each week, with at least one day of rest between workouts. After a few months of regular exercise, you may complete up to five workouts each week, if desired. Remember, the key to success is to make exercise a regular and enjoyable part of your everyday life.
SUGGESTED STRETCHES

The correct form for several basic stretches is shown at the right. Move slowly as you stretch—never bounce.

1. Toe Touch Stretch

Stand with your knees bent slightly and slowly bend forward from your hips. Allow your back and shoulders to relax as you reach down toward your toes as far as possible. Hold for 15 counts, then relax. Repeat 3 times. Stretches: Hamstrings, back of knees and back.

2. Hamstring Stretch

Sit with one leg extended. Bring the sole of the opposite foot toward you and rest it against the inner thigh of your extended leg. Reach toward your toes as far as possible. Hold for 15 counts, then relax. Repeat 3 times for each leg. Stretches: Hamstrings, lower back and groin.

3. Calf/Achilles Stretch

With one leg in front of the other, reach forward and place your hands against a wall. Keep your back leg straight and your back foot flat on the floor. Bend your front leg, lean forward and move your hips toward the wall. Hold for 15 counts, then relax. Repeat 3 times for each leg. To cause further stretching of the achilles tendons, bend your back leg as well. Stretches: Calves, achilles tendons and ankles.

4. Quadriceps Stretch

With one hand against a wall for balance, reach back and grasp one foot with your other hand. Bring your heel as close to your buttocks as possible. Hold for 15 counts, then relax. Repeat 3 times for each leg. Stretches: Quadriceps and hip muscles.

5. Inner Thigh Stretch

Sit with the soles of your feet together and your knees outward. Pull your feet toward your groin area as far as possible. Hold for 15 counts, then relax. Repeat 3 times. Stretches: Quadriceps and hip muscles.

ORDERING REPLACEMENT PARTS

To order replacement parts, please see the front cover of this manual. To help us assist you, be prepared to provide the following information when contacting us:

• the model number and serial number of the product (see the front cover of this manual)
• the name of the product (see the front cover of this manual)
• the key number and description of the replacement part(s) (see the PART LIST and the EXPLODED DRAWING near the end of this manual)

LIMITED WARRANTY

ICON Health & Fitness, Inc. (ICON) warrants this product to be free from defects in workmanship and material, under normal use and service conditions. The frame is warranted for a lifetime. The motor is warranted for twenty-five (25) years from the date of purchase. Parts and labor are warranted for one (1) year from the date of purchase.

This warranty extends only to the original purchaser (customer). ICON’s obligation under this warranty is limited to repairing or replacing, at ICON’s option, the product through one of its authorized service centers. All repairs for which warranty claims are made must be preauthorized by ICON. If the product is shipped to a service center, freight charges to and from the service center will be the customer’s responsibility. If replacement parts are shipped while the product is under warranty, the customer will be responsible for a minimal handling charge. For in-home service, the customer will be responsible for a minimal trip charge. This warranty does not extend to freight damage to the product. This warranty will automatically be voided if the product is used as a store display model, if the product is purchased or transported outside the USA, if all instructions in this manual are not followed, if the product is abused or improperly or abnormally used, or if the product is used for commercial or rental purposes. No other warranty beyond that specifically set forth above is authorized by ICON.

ICON is not responsible or liable for indirect, special, or consequential damages arising out of or in connection with the use or performance of the product; damages with respect to any economic loss, loss of property, loss of revenues or profits, loss of enjoyment or use, or costs of removal or installation; or other consequential damages of any kind. Some states do not allow the exclusion or limitation of incidental or consequential damages. Accordingly, the above limitation may not apply to the customer.

The warranty extended hereunder is in lieu of any and all other warranties, and any implied warranties of merchantability or fitness for a particular purpose are limited in their scope and duration to the terms set forth herein. Some states do not allow limitations on how long an implied warranty lasts. Accordingly, the above limitation may not apply to the customer.

This warranty provides specific legal rights; the customer may have other rights that vary from state to state.

ICON Health & Fitness, Inc., 1500 S. 1000 W., Logan, UT 84321-9813
